

BIOVEIN.

Vein Pattern Recognition.

BIOVEIN is an ultra-secure biometric reader, the result of a collaboration between Eden Innovations' development teams and Hitachi in Japan.

This reader integrates Hitachi's finger vein sensor, originally developed for use in ATMs.

Based on "internal" biometric reading, this tamper-proof technology is particularly well-suited for the most highly secured areas of the enterprise.

HIGH SECURITY

Anti-vandal protection
Tamper-proof and non-reproducible
Remote control module in standalone mode

FUNCTIONS

Integrated relay
3 operating modes
IP communication

REDESIGNED LOOK

UV-resistant treatment
Clear display screen
New black housing

BIOMETRIC SENSOR

HITACHI technology
1,000 fingerprints
Contactless finger vein reading
